Amplify your love

Whatever may happen
Whatever rocky roads you go
You got a companion
Leading you through through heights and lows
Like a guardian angel
Carefully watching over your mood
Always catching a fitting song
Out of the airwaves for you

I'm gonna meet my friends
Meet my friends in the practice room tonight
In commission of the gods
To create the soundtrack of your life
I plugged my guitar
I plugged my guitar right in your heart
We come to bring you in tune
To sound your soul and amplify your love

When your heart is a bleeding
Your head is confused
When your thinking is cheating you
Or your love is abused
Turn up the volume
Let the sound clean your mind
Let it flow through your body
And leave all your sorrows behind

I'm gonna meet my friends
Meet my friends in the practice room tonight
In commission of the gods
To create the soundtrack of your life
I plugged my guitar
I plugged my guitar right in your heart
We come to bring you in tune
To sound your soul and amplify your love
